

Environmental Policy

Network Energy Ltd has considered the impact on the environment of its services and activities and undertakes to assist clients to comply with ever increasing environmental demands and to minimise the environmental impact of its services and products.

Our principle environmental commitments are:-

- through the nature of our work, to undertake research, design, development and installation of low emissions heating systems that will meet appropriate client requirements
- to comply with all applicable legislation, codes of practice, regulatory controls and client or insurance requirements
- to minimise practically avoidable pollution or nuisance that may be caused by our activities
- to use energy and natural resources efficiently and to reduce consumption
Where possible
- to minimise the generation of waste and to dispose of unavoidable waste in a responsible manner
- to consider the environmental implications of changes to products, processes, materials and facilities when business decisions are made
- to continually improve our environmental performance through the setting and review of realistic and achievable objectives and targets
- to provide appropriate resources for the implications of this policy

This policy is implemented at Network Energy Ltd through our environmental management systems and changes to this policy shall be driven by audit results, changing circumstances and the commitment to continual improvement. Staff awareness of this policy is ensured by providing appropriate training.
